

## Mixing and Administration management for the TPN intensive care

- Valve controlled mixing system with 2 / 3 / 4 / 6 or 8 feeds
- Transfer system with syringe and drip chamber
- Different coloured clamps for safety orientation
- Special designed for the preparation of mixing solutions for the total parenteral nutrition (TPN) in the NICU/PICU

- One-piece-safety-administration-system for the (TPN) in the NICU/PICU
- Available with Luer-Lock connector or spike
- Automatic dosage valve
- Safety and easy handling
- Perfectly fitting for all commercially available syringe pumps
- Free of DEHP and latex

## Mixing and Administration management for the TPN intensive care

NC Code No.	DESCRIPTION	Packing unit
<b>Mixing systems</b>		
SN2000	Mixing set with 4 feeds, syringe	15
SN2000T	Mixing set with 4 feeds, drip chamber, syringe	10
SN2001	Mixing set with 3 feeds, syringe, extension	15
SN2001T	Mixing set with 1 feed, drip chamber, 50 ml syringe, extension	15
SN2001T10	Mixing set with 1 feed, drip chamber, 10 ml syringe, extension	20
SN2003	Mixing set with 3 feeds, drip chamber, syringe	15
SN2005	Mixing set with 2 feeds, drip chamber, syringe	10
SN2006	Mixing set with 6 feeds, drip chamber, syringe	10
SN2008	Mixing set with 8 feeds, drip chamber, syringe	5
SN2000	Mixing set with 4 feeds, syringe	15
SN2000T	Mixing set with 4 feeds, drip chamber, syringe	10
SN2001	Mixing set with 3 feeds, syringe, extension	15
<b>Administration systems</b>		
SN1035	Safety-administration system with LuerLock connector	50
SN1035A	Safety-administration system with spike	50
