

medOC - the optimal compounding system

medOC 3xx ES

- **2-channel compounder** comes with compact premium stainless steel body
- **Fast!** Filling rate up to 1000 ml per minute
- **Quiet!** Thanks to new low-noise mechanism technology
- **Flexible!** Standard with 50 ml syringe mount. Available with optional or 100 ml syringe for higher volume filling and 10 ml syringe for even more exacting dosage
- **Cost-effective** operation with commonly available bags or bottles
- **Intuitive control** using the touch-screen. A special service menu allows the quick customization for specific applications
- **Individual routines** e.g. for antibiotics or cytostatics-preparation
- **Alternative computer-controlled** executable on a MS Windows® PC for an in-process quality control and complete documentation
- **Designed for flexible use** wherever liquids have to be mixed, poured into another container or filled quickly and accurately e.g.
 - Individual patient i.v. requirements
 - Pediatric i.v. therapy
 - Total parenteral nutrition (TPN)
 - Chemotherapy and antibiotics
 - Filling of syringes , sterile filtration
